Dear Building 3 Townhouse Owners,

The digging of the holes is now scheduled to start tomorrow (Wed., 2/8) and finish on Saturday. They are trying to schedule the County to come inspect the work on Monday (2/13) and then seal the holes following this inspection, although this date is subject to change.

John Wallace has also contacted the County to follow up on the "Notice of Violation" that you have all received, and he is waiting for their response. At this point, we do not understand why the County sent this notice, since we have only done work under an approved permit, we have been communicating our updates with the County, and we are digging the holes in response to their request. I'll let you know after we hear back.

Thanks,
John
