Dear Building 3 Townhouse Owners,

As an update following this morning's Townhouse Committee meeting, the wave run-up report was completed and submitted to the County on July 20th. The County estimates that it will respond after 30 days. Once they accept the report, or we agree upon the requirements, then our engineers will prepare the final plans to address the slope grading issue.

As a reminder, in the mean time the Committee has blocked off the stairs because they not being safe for use until they are completed. Please make sure all your guests are instructed to use the main stairs.

Let me know if anyone has any questions.

Sincerely,  
John
